

Thabo Mtsweni

IT Support Specialist | Aspiring Network Engineer

Johannesburg, Gauteng, SA • +27 81 327 6153 • tmtsweni@hotmail.com • linkedin.com/in/thabomtsweni • [Portfolio](#)

PROFESSIONAL SUMMARY

Dedicated IT Support Specialist with 4+ years of progressive experience delivering high-volume technical support across ISP, enterprise, and BPO environments. Holds CompTIA A+ and Network+ certifications with hands-on expertise in TCP/IP, DNS, DHCP, VoIP, Active Directory, and Microsoft 365. Consistent track record of resolving complex connectivity issues, coaching non-technical users, and maintaining high QA scores. Currently pursuing CCNA to formalise networking expertise and transition into a Network Engineer role.

PROFESSIONAL EXPERIENCE

Tier 1 Technical Support Agent | Web Africa | Remote

May 2025 – Present

- Handle 70+ daily interactions via live chat, troubleshooting Fibre, LTE, and VoIP services for residential and business clients — maintaining a 93% first-contact resolution rate.
- Perform remote router configurations and network isolation to diagnose and resolve internet connectivity faults across Windows, macOS, and mobile platforms.
- Manage full account lifecycles including billing reconciliations and service escalations within internal CRM systems, consistently meeting QA benchmarks.
- Recognised for clear communication in translating complex technical solutions into actionable steps for non-technical customers.

Help-desk Agent – Tier 1 | Herotel | Potchefstroom, North West

Aug 2023 – Apr 2025

- Delivered patient, outcome-focused technical support for Windows 10/11 environments and the full Microsoft 365 suite, handling an average of 50+ tickets per day.
- Reduced repeat contacts on common software faults by creating reusable knowledge-base articles, improving team resolution speed.
- Diagnosed complex network faults using analytical tools, acting as a versatile first-line resource during high-volume periods and major infrastructure incidents.
- Meticulously documented all support requests, contributing to infrastructure trend analysis and proactive bug identification.
- Worked rotating shifts including after-hours and weekend standby, maintaining consistent performance and SLA compliance across all operational hours.

Digital Support Advisor – US Campaign | WebHelp SA | Johannesburg, Gauteng

Sep 2022 – May 2023

- Provided cross-cultural technical and digital support for North American clients across rotating shift schedules, achieving consistent CSAT scores above target.
- Guided non-technical users through platform navigation and feature adoption, reducing escalation rates by coaching self-service behaviours.

Application Support Agent | Discovery Health | Sandton, Gauteng

Jan 2022 – Mar 2022

- Assisted clients with application installation, navigation, and secure profile management, strictly enforcing account security and POPIA-compliant data handling.

IT Support Learnership | Discovery Health | Sandton, Gauteng

Jan 2021 – Dec 2021

- Completed a structured 12-month NQF Level 4 technical programme covering hardware assembly, OS installation, network infrastructure fundamentals, and IT support principles.

TECHNICAL PROJECTS

Cloud Infrastructure Lab | [GitHub](#)

- Designed and deployed a production-style Azure Virtual Network (VNet) featuring isolated Frontend and Backend subnets to simulate real-world environment tiering.
- Hardened network security by configuring Network Security Groups (NSGs) to enforce least-privilege access, restricting SSH/RDP traffic to a trusted home IP while allowing public HTTP traffic.
- Validated inter-subnet connectivity and documented full IP schema and network topology.

Enterprise Network Simulation | [GitHub](#)

- Simulated a multi-department enterprise network in Cisco Packet Tracer connecting a Head Office and Branch Office.
- Implemented VLAN segmentation (HR, IT, Guest) with 802.1Q trunking and enabled inter-VLAN routing via Router-on-a-Stick.
- Deployed OSPF and EIGRP dynamic routing protocols to ensure efficient traffic propagation across the multi-site infrastructure.
- Applied extended Access Control Lists (ACLs) to secure the internal server subnet from Guest VLAN traffic.

Hybrid Cloud Bridge | [GitHub](#)

- Established a Site-to-Site IPsec VPN tunnel between an on-premise environment (simulated via pfSense on VirtualBox) and Microsoft Azure.
- Configured an Azure Virtual Network Gateway (VpnGw1) and utilised StrongSwan IKEv2 for secure, encrypted cross-environment communication.
- Demonstrated proficiency in hybrid cloud integration, routing, and tunnel troubleshooting — critical for modern NOC roles.

CERTIFICATIONS

CompTIA Network+ (N10-009) — CompTIA	2026
CompTIA A+ (220-1202) — CompTIA	2026
Cisco Networking Basics — Cisco Networking Academy	2025

EDUCATION

IT Technical Support – NQF Level 4 Altron People Solutions Randburg, Gauteng	2021
Higher Education Studies Certificate Monash South Africa Ruimsig, Gauteng	2018
National Senior Certificate – Information Technology Stream Itshupeng Secondary School Schweizer-Reneke, North West	2015

TECHNICAL SKILLS

Operating Systems: Windows 10/11, macOS, Android, iOS

Networking: TCP/IP, DNS, DHCP, VoIP, LTE, Fibre, ping, traceroute, nslookup, Wireshark

Cloud & Virtualisation: Azure Virtual Networks, NSGs, VPN Gateway, VirtualBox, pfSense

Network Simulation: Cisco Packet Tracer — VLANs, OSPF, EIGRP, ACLs, Router-on-a-Stick

Identity & Collaboration: Active Directory, Microsoft 365, Google Workspace

Remote Support: AnyDesk, TeamViewer, Remote Desktop Protocol

Web & Data: HTML, CSS, JavaScript, Node.js, PostgreSQL

Ticketing & CRM: Zendesk, Freshdesk, internal CRM platforms

Hardware: Assembly, diagnostics, OS installation, peripheral repair

Certifications: CompTIA A+, Network+, Cisco Networking Basics
